

Animal species of special concern reported from the Oak Ridge Reservation ^a

The following list identifies sensitive wildlife species recently found on the Oak Ridge Reservation. Some of these (e.g., anhinga) have been seen only once or a few times; others (e.g., sharp-shinned hawk, southeastern shrew) are comparatively common and widespread on the reservation. (Updated June 2008)

Scientific name	Common name	Status ^b		
		Federal	State	PIF ^c
Fish				
<i>Phoxinus tennesseensis</i>	Tennessee dace		NM	
Amphibians and Reptiles				
<i>Hemidactylium scutatum</i>	four-toed salamander		NM
